

99's Chapter Meeting, Potomac Maryland

The January meeting will host two topics. John Somiak will discuss the operational and safety issues of winter flying in GA aircraft. Winter weather in our area of the country can adversely affect flight operations. Poor weather conditions require careful planning in order to minimize their effects. Operation in this environment requires special winter operating procedures. We will cover pre-flight planning, aircraft preparation, operation of aircraft, takeoff, en route operations, and landing. Tim Metzinger will discuss the need for proficiency flying, and fun ways you can add new skills to your aviation toolset and deepen your mastery of your aircraft.

Note: This is a closed event open only to the members of the Ninety-Nines.

Directions: This meeting is held in a private residence.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
